SUMMARY

Backend Engineer with 1.8+ years at Accenture building and operating 3 live backend services in a large-scale retail integration platform, processing 25.3k+ events daily at 100 ms latency. Skilled in **Spring Boot, REST API design, and event-driven architecture**, with strong algorithmic depth from **720+ LeetCode** solutions. Targeting **Java Backend / SDE-1** roles on product-focused engineering teams.

TECHNICAL SKILLS

Languages: Java, SQL/MySQL, C#, JavaScript, YAML, Bash

Java Ecosystem: Spring Boot 3, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, Maven, JUnit, Mockito

Architecture: Microservices, Event-Driven Architecture, System Design (HLD/LLD), OOP, SOLID, Design Patterns

Cloud & DevOps: Azure Functions, Service Bus, Blob Storage, API Management, Application Insights, Azure DevOps CI/CD, Docker, Git

Databases & Tools: MySQL, Query Optimization, Postman, Swagger/OpenAPI

CS Fundamentals: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Computer Organization and Architecture

EXPERIENCE

Accenture

Nov 2024 – Present

Software Engineering Associate | Packaged App Development

Chennai, India

- Delivered **3 production backend integration services** end-to-end for a leading grocery retailer across C#/.NET 8, ARM IaC, and Azure DevOps CI/CD.
- Shipped an event-driven, Service Bus-triggered microservice processing **25.3k+ events/day at 100 ms latency**, with **100% application-layer correctness**.
- Designed an HTTP order-document service on the **Claim-Check pattern** with **OAuth2/Azure AD**, decoupling producer and consumer flows for delivery to **SAP S/4HANA**.
- Safeguarded production reliability across **25+ incidents** via DLQ triage and PMR root-cause analysis, partnering with onshore and downstream teams in Agile/Scrum.
- Diagnosed intermittent **HTTP 503** failures using App Insights KQL and applied exponential backoff with jitter, eliminating partner-API retry storms.
- Migrated **8 services from .NET 6 to .NET 8** and standardized structured logging across **10 services**; cleared Accenture's Cloud-Native Microservices Residency in Java, Spring Boot, and Docker.

PROJECTS

Blog-Zone | *Spring Boot, Spring Security, Hibernate, MySQL, Docker* | [Live](#) | [GitHub](#)

- Built a full-stack blogging platform with **RBAC** across 3 roles, covering publishing, comments, likes, saves, search, and user-follow features.
- Modelled **4+ normalized JPA entities** on MySQL and exposed **REST APIs** with Spring Data pagination/sorting, returning paginated JSON with metadata.
- Secured registration and login using the Spring Security filter chain with password hashing and custom validation for credential mismatch handling; deployed on Render using Docker with a cloud-hosted MySQL database.

WeatherSpot | *Spring Boot, REST APIs, Thymeleaf, Docker* | [Live](#) | [GitHub](#)

- Engineered a weather platform serving real-time, hourly, **15-day forecasts**, and historical data spanning **50+ years** (1973–present).
- Integrated external **REST APIs** with **3-key rotation** and fallback handling, cutting rate-limit failures during heavy testing.
- Crafted a responsive Glassmorphism UI with Thymeleaf and JavaScript; deployed on Render via Docker.

PushNPull | *Node.js, Express.js, JavaScript, REST APIs* | [Live](#) | [GitHub](#)

- Developed an API testing tool supporting **6 HTTP methods** with Basic Auth, Bearer Tokens, custom headers, and configurable payloads.
- Added request-history tracking and real-time latency monitoring with syntax-highlighted response inspection in a responsive dark-themed UI.

TECHNICAL ACHIEVEMENTS

Algorithmic Depth: Solved **720+ LeetCode problems in Java** across Arrays, Trees, Graphs, and DP; earned **CodingBat 5-Star Gold** (15+ categories) and **HackerRank 5-Star**.

Mentorship: Selected as **1 of 6 senior students** to teach Java, OOP, and Data Structures to a first-year cohort through a college bootcamp.

EDUCATION

SNS College of Engineering

Bachelor of Engineering in Computer Science and Technology | **CGPA: 8.8**

Coimbatore, India

May 2020 – Apr 2024
